

## A message from the President

On behalf of the Board of Directors of the Code Officials Association of Alabama, I would like to extend a welcome to this year's COAA Education Conference and Vendor's Show at beautiful Lake Guntersville. Lake Guntersville was one of the areas in Alabama hit by the extensive and deadly tornadoes and severe storms last year. The loss of life and property last year reinforces the importance of the role Code Officials and others play in an effort to ensure that our communities are as safe as possible.

Track 1 of our two day education conference is an ICC Institute – When Disaster Strikes. This two day course is a guide to preparing for and managing the unexpected disasters we all could potentially face. Track 2 is an opportunity for instruction on Code issues, as well as Vendor's classes on the latest products and technology. We encourage you to take advantage of this quality continuing education at a very affordable price. Also, please take advantage of the opportunities for networking with your peers. This is a valuable resource all should utilize to the fullest extent possible. I believe you will be pleased with the accommodations, and the educational instruction will provide you additional tools in your tasks in protecting the life, safety, health, and welfare of your communities.

We are looking forward to seeing you at Lake Guntersville.

David Veal

Rooms are **limited** so reserve yours today.

Rates start at \$80.00/night + tax
